

HAMZA JUNAID

Full Stack Web Software Developer

Hyderabad, Telangana, India | hamza.junaid2002@gmail.com | +91 80744 20291

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Web & Mobile Software Developer with strong full-stack experience across MERN and modern web technologies. Proven ability to design, build, and deploy scalable Progressive Web Applications (PWAs), RESTful APIs, and data-driven systems. Experienced in frontend performance optimization, backend integration, authentication, and cloud deployment. Adept at working in fast-paced environments and delivering production-ready solutions end to end.

TECHNICAL SKILLS

Web & Mobile Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), REST and Context APIs, HTML5, CSS3, JavaScript (ES6+), Tailwind, Bootstrap, Figma

Backend & Frameworks: Node.js, Express.js,

Databases & Cloud: MongoDB, MySQL, PostgreSQL, Docker

Programming Languages: Python (Intermediate), C/C++ (Basic), Java (Basic)

Tools & Version Control: Git/GitHub, VS Code, Postman, Thunder Client

PROFESSIONAL EXPERIENCE

Full Stack Developer 05/06/2025 – 2/02/2026

Axioms Labs

- Developed and maintained full-stack web features using the MERN stack (MongoDB, Express.js, React.js, Node.js), building responsive interfaces and scalable backend services.
- Built and integrated RESTful APIs to enable reliable communication between frontend and backend systems.
- Collaborated with the engineering team on code reviews, debugging, and performance improvements.
- Contributed to feature development and deployment workflows, delivering production-ready solutions on schedule.

Freelance UI/UX Developer & API Integration Specialist

- Designed and developed responsive, scalable web interfaces for startups across e-commerce, SaaS, and service domains.
- Integrated RESTful APIs and backend services for seamless data flow and performance.
- Delivered end-to-end solutions from wireframing and prototyping to deployment.
- Managed multiple client projects with clear communication and on-time delivery.

PROJECTS

QMet — Client Website (Frontend/UI-UX) *Next.js* | *Live:* <https://qmet.onrender.com>

- Designed and developed the UI/UX for a client website per their brand and design requirements.
- Built a responsive, accessible frontend using Next.js and Tailwind CSS.
- Developed ready to integrate backend API endpoints with Node.js/Express.js and PostgreSQL for data storage.
- Deployed the application on Render for client review and production use.

LifeOS AI — Full Stack App *Live:* <https://lifeosai.vercel.app>

- Designed and developed a productivity-focused web application with AI-assisted workflows to help users manage tasks, notes, and personal organization efficiently.
- Built a responsive, mobile-first interface ensuring seamless performance across desktop, tablet, and mobile devices.
- Implemented MongoDB as the primary database to provide a scalable, flexible, and high-performance data storage solution for the application.
- Deployed the frontend on Vercel and backend services on Render, optimizing performance, scalability, and real-world production reliability.

E-Commerce Platform (MERN Stack)

- Built a full-stack, two-sided e-commerce platform for nationwide pharmaceutical product sales.
- Implemented role-based authentication for Sellers (inventory management) and Customers (ordering & tracking).
- Developed RESTful backend APIs with Node.js/Express.js and MongoDB.
- Engineered pricing and checkout logic ensuring transparency and accuracy.

Driver Drowsiness Detection System (.NET / Python / PostgreSQL)

- Developed a real-time safety application to detect driver fatigue using computer vision.
- Built frontend and backend using .NET 9.0 (Razor Pages) with secure authentication and trip tracking.
- Implemented Python-based eye-blink and facial landmark detection using OpenCV and Dlib.
- Integrated Twilio API to send automatic SMS alerts to emergency contacts.
- Stored user data, trip history, and detection logs in PostgreSQL.

Wedding Planner Portfolio & Lead Generation System (PHP/MySQL)

- Created a client-facing portfolio website with an integrated quotation request system.
- Built frontend using pure HTML, CSS, and JavaScript.
- Developed backend using PHP and MySQL with an admin dashboard for inquiry management.
- Successfully delivered a commercial client project.

EDUCATION

B.Tech in Computer Science — 80% Aug 2021 – Aug 2025

Jawaharlal Nehru Technological University, Hyderabad

Thesis: Driver Drowsiness Detection System (Full-Stack)

Intermediate (CBSE)

Senior Secondary: 79%

Secondary : 75%

CERTIFICATIONS

- Python Programming — Full Stack Academy
- AWS (EC2 & S3) — LinkedIn Learning
- Microsoft Azure AI Essentials Professional — Microsoft
- C# and .NET Essentials

LEADERSHIP & ACHIEVEMENTS

- Team Lead @ Thinksmate Telangana — Led interns to develop accurate and timely data dashboards.
- Winner — Multiple Inter-College Technical Quizzes & Debugging Competitions.
- Winner — Intra-College Ideation and Innovation Challenge 2024.
