## SUMMARY

---

Innovative Software Engineer with 1+ years of experience building scalable, cloudnative web applications and AI-driven solutions. Expert in backend development with Java Spring Boot and Python, skilled in microservices, containerization, and CI/CD. Passionate about integrating AI agents to automate workflows and drive business impact.

## SKILLS

---

Languages: Java, Python, SQL, JavaScript | Frameworks & Libraries: Spring Boot, FastAPI, React.js, LangChain | AI & Machine Learning: OpenAI API, TensorFlow, scikitlearn | Databases & Caching: MySQL, PostgreSQL, MongoDB, Redis | Cloud & DevOps: AWS (EC2, EKS, Lambda), Docker, Kubernetes, Jenkins, GitLab CI/CD | Messaging & Streaming: Apache Kafka | Tools & Methodologies: RESTful APIs, GraphQL, Microservices, Agile/Scrum

## EXPERIENCE

---

Full Stack Web Developer

May 2025 – feb 2026

Digitrol Solutions, Hyderabad

- Built and maintained FastAPI and Node.js microservices for a SaaS operations platform used by internal teams and B2B clients.
- Designed PostgreSQL and MongoDB data models for task tracking, user roles, and audit logs, supporting 50k+ records with optimized queries.
- Implemented JWT-based authentication, role-based access control, and secure API gateways to protect customer data.
- Developed background workers using Celery and Redis to handle email notifications, report generation, and scheduled data syncs.
- Integrated third-party APIs (payment gateway, email, and CRM) and handled failures using retry queues and circuit breakers.

## Experience Gained On

---

Aether AI – Automation web app

Live: <https://task-weaver-xi.vercel.app/>

- Designed and developed an intelligent AI assistant for seamless trip planning, leveraging advanced AI algorithms to deliver optimal and personalized travel experiences.
- Built a dynamic itinerary generator that creates personalized trip plans and intelligently schedules tasks and activities based on user preferences.
- Implemented automated email delivery to send detailed itineraries directly to users upon request, integrating Email API for reliable communication.
- Developed a full-stack application using React, Node.js, and Express.js with Supabase as the backend database and Google Auth for secure user authentication.
- Integrated multiple AI/ML APIs to power intelligent automation, recommendations, and scheduling logic across the platform.

LifeOS AI

Live: <https://lifeosai.vercel.app>

- Designed and developed a productivity-focused web application with AI-assisted workflows to help users manage tasks, notes, and personal organization efficiently.
- Built a responsive, mobile-first interface ensuring seamless performance across desktop, tablet, and mobile

devices.

- Implemented Progressive Web App (PWA) features including installability, app manifest configuration, and offline-ready architecture.
- Deployed the frontend on Vercel and backend services on Render, optimizing performance, scalability, and real-world production reliability.

## Projects

---

### E-Commerce Platform (MERN Stack)

- Built a full-stack, two-sided e-commerce platform for nationwide pharmaceutical product sales.
- Implemented role-based authentication for Sellers (inventory management) and Customers (ordering & tracking).
- Developed RESTful backend APIs with Node.js/Express.js and MongoDB.
- Engineered pricing and checkout logic ensuring transparency and accuracy.

### Driver Drowsiness Detection System (.NET / Python / PostgreSQL)

- Developed a real-time safety application to detect driver fatigue using computer vision.
- Built frontend and backend using .NET 9.0 (Razor Pages) with secure authentication and trip tracking.
- Implemented Python-based eye-blink and facial landmark detection using OpenCV and Dlib.
- Integrated Twilio API to send automatic SMS alerts to emergency contacts.
- Stored user data, trip history, and detection logs in PostgreSQL.

### Wedding Planner Portfolio & Lead Generation System (PHP/MySQL)

- Created a client-facing portfolio website with integrated quotation request system.
- Built frontend using pure HTML, CSS, and JavaScript.
- Developed backend using PHP and MySQL with an admin dashboard for inquiry management.
- Successfully delivered a commercial client project.

## Certifications

---

- Python Programming — Full Stack Academy
- AWS (EC2 & S3) — LinkedIn Learning
- Microsoft Azure AI Essentials Professional — Microsoft
- C# and .NET Essentials

## EDUCATION

---

### Bachelor of Technology (BCA)

Jawaharlal Nehru Technological University, Hyderabad

2021– 2025
